Cybersecurity as a Service: simplifying data protection

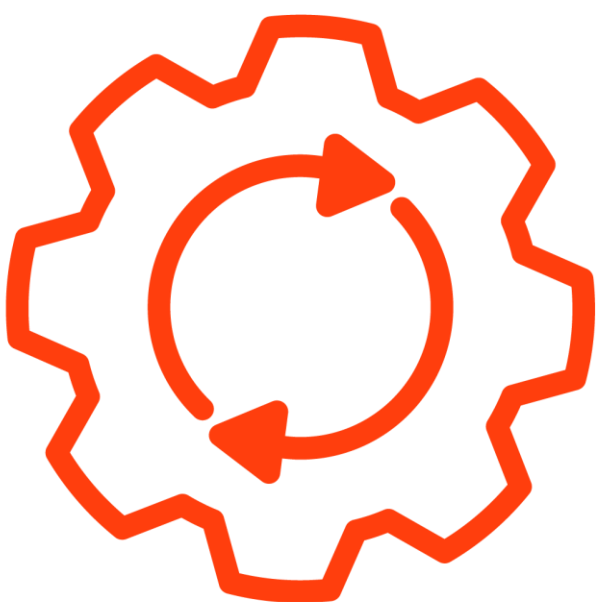

Put your security in the hands of experts and ensure the integrity of your data

+ Service Model

We offer a cybersecurity-as-a-service model adapted to the needs of the client, with a team that responds immediately to their needs, both in protection and in remedying the damage generated, we use state-of-the-art tools to offer the best service at your disposal

+ Service benefits

We carry out the service by modules, antivirus, vulnerability protection, mobile device management, platform shielding, cyber intelligence, as well as backup tools.

The customer receives a periodic report on the security status as well as access to a real-time portal with the status of the service under a single tool.

No commitment to permanence, monthly cost without surprises, no cost per download, price fixed from the beginning of the service.

+ Success stories

We have several success stories, both in industry, public sector, health sector, or retail, an example is a pharmaceutical laboratory which protects all its assets from vulnerabilities in any of its headquarters worldwide from a single console, we can tell you first-hand from **Estratec360**
