Cyber Intelligence as a Service: getting closer to the source of the problem

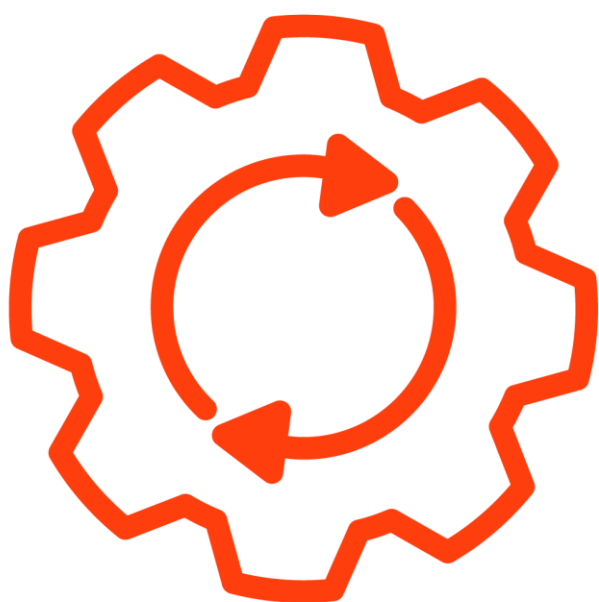

Put your security in the hands of experts and ensure data integrity

+ Service Model

We continuously search the open, deep & dark web to uncover customer-specific threat information, using automated technology to streamline the process 24x7. We retrieve and deliver this intelligence in a modular format, giving clients a simple way to confront external cyber threats and manage their digital risk.

+ Service benefits

We perform the service by modules, credentials, dark web, social media, Domain Protection, Data Leakage and Mobile Apps to deliver to the client only what they need

The customer periodically receives a security status report as well as access to a real-time portal with the status of the service under a single tool, and **Estratec360** takes care of receiving and managing alerts in real time

+ Success stories

We have several success stories, both in industry, public sector, health sector, or retail, an example is a hospital center which had a credential leak through a third-party portal which was previously hacked, we can tell you first-hand from **Estratec360**
